Take Care Project

Healthcare Language Guide For Migrants

Being healthy is one of the most important preconditions for an individual to live and function normally in everyday life. If an individual feels ill or suffers from a disease, s/he goes to see a doctor and gets medical treatment. Migrants, who do not speak the language sufficiently, experience real communication problems when they need medical help. That's why we started the Take Care Project!

Aims

- Help migrants to improve knowledge about health matters in a new language
- Make health care more accessible for migrants and improve their integration
- Create a European wide network of associated partners
- Contribute to intercultural communication

Activities

- Perform needs and experiences analysis
- Collect 'good practice' examples
- Develop Healthcare Language Guide for Migrants
- Develop methodology for trainings
- Offer trainings to organizations and institutions
- Organise short language courses

Partners

Partners from 8 European countries: Bulgaria, Cyprus, Germany, Lithuania, The Netherlands, Portugal, Romania and Spain cooperate closely with organisations supporting migrants' integration and welfare, educational institutions and health care providers to create a European-wide network during the project lifetime: November 2012 - October 2014.

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.
